LEFTISM IN INDIA, 1917–1947, 2e
Late Satyabrata Rai Chowdhuri Professor of Political Science, Rabindra Bharati University, Kolkata

This book provides a comprehensive account of the Leftist movements in India during the most decisive phase of its struggle for freedom. It also describes how the Leftist movements interacted with the mainstream Indian freedom movement led by the Indian National Congress, guided by Mohandas Karamchand Gandhi and his ideology of non-violence. This ideology directly opposed those who believed in Marxism–Leninism and, naturally, their policies clashed at almost every stage of the freedom movement. These clashes gave rise to dramatic developments, which have been described in this book in their proper context and analysed with scholarly objectivity.

R R Suresh Retd. Reader, Department of Economics, Ramjas College, Delhi University

The book explains the emergence, evolution and working of the capitalist system with the help of some of the major principles and theories of economics, both mainstream and heterodox. It interrelates economics and economic life with other aspects of our lives—social, cultural, political, religious and intellectual. It departs from the traditional analysis of the capitalist system in integrating the real sector of the economy with its monetary sector, and carries forward Keynes’ analysis. It combines Keynesian and Marxian approaches to the subject and emphasises the dialectical unfolding of life that underlies the interrelation between the economy, state and society. It underlines that the capitalist system is constantly changing, propelled by the tendency towards increasing concentration of ownership and control of the means of production in fewer and fewer hands. The book comes with an Instructor’s Manual to aid the teaching of the subject.
